It's Show Time in Singapore

It's Show Time in Singapore

With the global textile and apparel market projected to exceed **US\$2.1 trillion by 2030**, investment in advanced manufacturing technologies is accelerating. At ITMA ASIA + CITME, Singapore 2025, visitors will discover the latest solutions across the textile value chain — from fibre production to finishing and digitalisation — all under one roof.

Fibre Production and Spinning (Halls 3 & 4)

With global fibre consumption expected to reach **125 million tons next year**, spinning remains the backbone of textile manufacturing. Extrusion technologies for filament production will be a key focus, with companies such as **Fare, Fibre Extrusion Technology, Oerlikon Barmag/Neumag, Plasco, Saurer, Truetzschler and Toyota** presenting their latest solutions for improved process efficiency and automation.

Knitting (Hall 5)

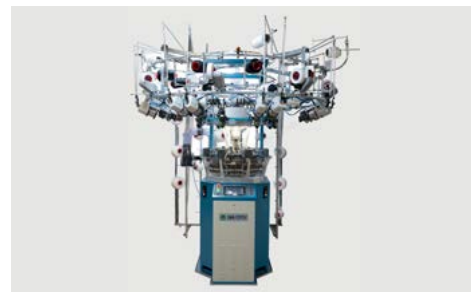

Hall 5 will be home to some of the world's leading knitting and embroidery machinery suppliers. Exhibitors including **Karl Mayer**, **Keumyong** and **Santoni** will showcase technologies ranging from whole-garment knitting to high-speed warp knitting and multicolour motifs produced without additional dyeing, all supporting resource efficiency and design flexibility.

Weaving, Braiding and Nonwovens (Hall 2)

Hall 2 will provide a comprehensive showcase of weaving, braiding and staple fibre nonwovens processing equipment. Visitors can meet exhibitors such as **Dilo**, **Dornier**, **Haijia** and **Herzog**, who are advancing eco-efficient weaving with reduced selvedge waste, lower compressed air consumption and improved digital control.

Dyeing, Finishing and Printing (Halls 6–8)

The finishing sector remains a strong draw, with solutions that help mills save water, energy and chemicals through smarter application processes and modular retrofits. Across Halls 6, 7 and 8, exhibitors including **Benninger**, **Canlar**, **Konica**, **SPG** and **Thies** will present sustainable dyeing, finishing and printing technologies that combine quality, efficiency and environmental performance.

Digitalisation and Recycling Across the Value Chain

Beyond machinery sectors, digitalisation continues to transform textile manufacturing through AI-driven monitoring, predictive maintenance and process optimisation tools. Recycling and circularity remain in the spotlight, with technologies for fibre recovery, sorting and circular spinning systems helping the industry progress towards a more sustainable future.

Just a Glimpse of What Awaits

These highlights represent only part of the more than 800 exhibitors from 30 countries and regions who will showcase their latest technologies in Singapore. Visitors can expect to find solutions across 19 product sectors, with live machinery demonstrations bringing the future of textile and garment manufacturing to life.

ITMA ASIA + CITME, Singapore 2025 Sector & Facility Plan

Sectors

- Braiding, Nonwovens, Weaving
- Plant Ops Equipment, Spinning, Testing, Winding
- Embroidery, Knitting
- Colourants & Chemicals, Garment Making, Printing & Inks
- Composites, Finishing, Recycling, Research & Innovation, Software & Automation

Logistics is available in H3 and H6. Services can be found in all halls.

Legend

- A1 CEMATEX & Rest of the World Association Offices
- A2 CTMA & CCPIT TEX Offices
- Automated External Defibrillator (AED)
- First Aid
- Food & Beverages
- Information Counter/Concierge
- Left Luggage
- Media Centre
- Meeting Rooms
- Prayer Room (H6: Level 2, H7: Level 1)
- Travel Desk
- Visitor Registration

Visa

Short-term travellers holding a passport or travel document from a country requiring a visa must apply for one before entering Singapore.

- Apply early:** Submit your visa application 30 days before your intended date of arrival.
- Letter of Invitation:** You may request for a Letter of Invitation when registering for your badge. Once your registration is successfully completed, the visa letter will be sent to you (if requested).
- Additional requirement:** For some countries, the submissions of Form 39A is required.
